SUMMARY

Product leader with proven success shipping AI-powered agentic workflows and LLM orchestration that simplify complex operational tools and decision support. Skilled in cross-functional collaboration and roadmap ownership to deliver scalable, user-centric AI products driving business impact.

CORE SKILLS

Product Strategy • APIs • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Built AI-powered agentic workflows integrating sales, advertising, and inventory data to automate decision support, reducing manual reporting time by 80% and accelerating PPC bid optimization across multiple marketplaces.
- Developed a custom inventory management platform consolidating warehouse and fulfillment operations, eliminating fragmented workflows and achieving 100% inventory error reduction through streamlined AI-driven tooling.
- Designed lightweight operational systems as ERP alternatives, enabling scalable inventory and fulfillment coordination that supported SKU growth from 9 to 15 without enterprise software investment.
- Conducted iterative customer discovery and product testing cycles, refining AI-driven features and workflows to enhance user experience and align product roadmap with stakeholder priorities and market needs.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Prioritized scalable AI-powered telemetry capabilities by synthesizing customer requirements into reusable platform features, reducing custom development requests to 1% while covering 80% of enterprise needs.
- Influenced cross-functional roadmap strategy through executive and customer collaboration, aligning AI workflow priorities with business goals and enhancing decision-support tool delivery.
- Defined platform strategy balancing scalability and engineering capacity, enabling seamless integration of agentic AI workflows that improve operational efficiency and user-centric automation.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Established a RICE-based roadmap prioritization framework that enhanced transparency, sprint planning, and stakeholder alignment for complex AI-driven platform features and automation workflows.
- Coordinated cross-functional delivery across software, firmware, hardware, UX, and analytics teams, enabling seamless integration of AI-powered agentic workflows within connected-device platforms.
- Aligned diverse technical and product stakeholders by creating shared execution plans and clarifying dependencies, accelerating scalable AI feature releases that improved operational decision support.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
