SUMMARY

Proven Senior Product Manager driving AI product vision and delivery of scalable, agentic workflows and copilot tools that automate complex operational processes and enhance user engagement. Skilled in cross-functional leadership and customer discovery to translate AI capabilities into intuitive, trustworthy experiences aligned with business goals.

CORE SKILLS

Product Strategy • APIs • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Orchestrated AI-powered analytics agents using OpenAI APIs to automate sales and PPC workflows, cutting manual reporting time by 80% and enabling daily operational KPI monitoring across marketplaces.
- Orchestrated AI-powered PPC optimization workflows integrating Python KPIs with OpenAI recommendations, scaling keyword prioritization and bid decisions to improve consistency and achieve a 20% TACOS target.
- Centralized inventory operations by launching a custom platform that eliminated fragmented workflows and cut inventory errors by 100%, enhancing operational visibility across warehouses and FBA systems.
- Orchestrated centralized inventory workflows integrating Amazon FBA, AWD, distributors, and warehouses, enhancing multi-channel fulfillment coordination and reducing inventory inconsistencies across five distributors and marketplaces.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Orchestrated cross-functional roadmap prioritization with executives, engineers, and customers to align API platform development with enterprise needs, enhancing customer-driven product vision and executive stakeholder visibility.
- Synthesized customer telemetry requests into scalable platform features, boosting roadmap alignment and reducing custom solutions to 1%, covering 80% of enterprise customer needs.
- Owned roadmap for telemetry analytics platform, prioritizing reusable capabilities that met 80% of enterprise needs, cut custom solutions to 1%, and boosted scalability while aligning engineering capacity.
- Conducted customer discovery to identify recurring enterprise workflows, translating them into reusable API platform capabilities that aligned the roadmap, reduced custom requests, and expanded platform adoption.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Defined and scaled a RICE-based prioritization framework for MyQ Community platform, boosting roadmap transparency, sprint planning discipline, and cross-team stakeholder alignment on biweekly Agile cycles.

- Orchestrated cross-functional execution plans across software, firmware, hardware, UX, and analytics teams to align delivery and scale MyQ Community IoT platform initiatives.
