SUMMARY

Product manager with experience building and shipping AI-enabled workflows that automate decision support and operational tools using OpenAI APIs. Skilled at collaborating across teams to deliver scalable, user-centric AI products that improve efficiency and drive measurable business impact.

CORE SKILLS

Product Strategy • APIs • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered workflows using OpenAI APIs and Python to automate sales reporting and PPC bid analysis, reducing manual effort by 80% and enabling daily operational monitoring.
- Created AI-assisted PPC optimization tools combining Python calculations with AI-generated recommendations, improving decision consistency and scaling keyword prioritization workflows.
- Designed and implemented a custom inventory management platform with Streamlit and Hugging Face Spaces, consolidating fragmented workflows and eliminating inventory errors across multiple warehouses.
- Built lightweight internal operational systems as an ERP alternative, enhancing inventory and fulfillment coordination to support SKU growth from 9 to 15 without enterprise software investment.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Collaborated with executives and engineering teams to align API and analytics roadmap priorities with customer needs, enhancing platform growth and executive insight.
- Synthesized diverse customer requirements into scalable telemetry analytics features, reducing custom development requests to 1% while covering 80% of customer needs.
- Prioritized reusable platform capabilities that balanced engineering capacity and customer demand, improving scalability and focusing on high-value features.
- Simplified REST API integrations and onboarding processes, boosting enterprise API adoption by 35% and expanding platform usage.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Introduced a RICE-based prioritization framework to clarify roadmap decisions for the MyQ Community platform, enhancing sprint planning and aligning product, engineering, and support teams around shared priorities.
- Collaborated with UX, engineering, and customer-facing teams to identify and address key user friction points, boosting NPS by 10 points and increasing platform engagement.
