SUMMARY

Product manager with hands-on experience leading full product lifecycles for AI-augmented SaaS and IoT telemetry analytics. Skilled at balancing scalable platform strategies with customer-driven priorities and aligning cross-functional stakeholders to deliver impactful enterprise solutions.

CORE SKILLS

Product Strategy • Forecasting Systems • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Launched customer-facing analytics capabilities from telemetry data, generating over \$200K in new revenue and expanding product adoption through a scalable MVP approach.
- Translated diverse customer workflows into reusable platform features by conducting in-depth discovery sessions, reducing custom development requests to 1% and improving roadmap focus.
- Balanced customer demands and engineering capacity to define a scalable telemetry analytics strategy, prioritizing summary-level reporting that covered 80% of customer needs and enhanced delivery efficiency.
- Collaborated with executives and engineering teams to align analytics and API roadmap priorities, improving stakeholder visibility and supporting platform growth through customer-driven tradeoff decisions.

LITET

Technical Product & Analytics Lead | 2023 - Present

- Accelerated revenue growth by 400% YoY and boosted ROAS from 1.2 to 4.0 through strategic optimization of pricing, product listings, and PPC campaigns across Amazon, Shopify, and distributor channels.
- Drove scalable expansion by integrating product experimentation with channel and advertising strategies, balancing growth with margin control and operational efficiency.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Prioritized and delivered features for the MyQ Community platform by applying RICE methodology within Agile sprints, improving backlog efficiency and sprint completion across frontend, backend, and QA teams.
- Developed executive dashboards consolidating onboarding, engagement, and IoT device metrics, enhancing VP-level visibility into platform adoption and informing strategic roadmap decisions.
