SUMMARY

Product leader with hands-on experience independently launching and iterating early-stage e-commerce products through customer discovery and data-driven experimentation. Built AI-enabled workflows to automate analytics and support scalable decision-making, driving 400% revenue growth and improved product-market fit.

CORE SKILLS

Product Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Scaled LITET's DTC revenue 400% YoY by integrating product experimentation, multi-channel pricing, and PPC optimization, boosting ROAS from 1.2 to 4.0 while expanding marketplace and distributor presence.
- Conducted 20+ cyclist interviews and iterative product tests over six months to refine sock fit, materials, and pricing, validating product-market fit and enabling successful launch and adoption.
- Developed AI-powered Python workflows leveraging OpenAI APIs to automate sales and PPC bid analysis, cutting manual reporting time by 80% and accelerating daily decision-making across Amazon and Shopify channels.
- Created custom internal tools using Python and SQLite to replace ERP systems, improving inventory management and fulfillment coordination, supporting SKU growth from 9 to 15 without enterprise software investment.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Launched a customer-facing analytics product from MVP to market, generating over \$200K in new revenue and expanding adoption through targeted feature development.
- Translated recurring customer workflows into reusable platform capabilities, reducing custom development requests and improving alignment between product roadmap and user needs.
- Prioritized scalable telemetry analytics features that addressed 80% of customer requirements while minimizing custom solutions to 1%, enhancing platform efficiency and delivery speed.
