SUMMARY

Senior Product Manager with hands-on experience leading AI-enabled workflows and scalable analytics platform roadmaps. Skilled in prioritizing customer-driven features and aligning cross-functional teams to deliver impactful, agile solutions that balance technical feasibility and business needs.

CORE SKILLS

Product Strategy • APIs • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Established a RICE-based prioritization framework to resolve competing stakeholder demands, enhancing roadmap clarity and sprint planning for the MyQ Community platform.
- Coordinated Agile backlog management and sprint execution across frontend, backend, and QA teams, improving feature delivery consistency and bug prioritization in two-week cycles.
- Analyzed product usage and customer feedback to identify friction points, driving roadmap decisions that increased platform adoption by 15% and boosted user engagement.
- Balanced feature requests, bug fixes, and platform improvements through structured prioritization, fostering stronger alignment among product, engineering, and support teams.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Collaborated with executives, engineers, and customers to prioritize analytics and API roadmap initiatives, enhancing alignment between customer needs and platform scalability.
- Synthesized diverse customer telemetry requirements into scalable product features, reducing custom development requests to 1% while covering 80% of use cases.
- Defined MVP scope emphasizing summary-level telemetry reporting, balancing customer demands with delivery efficiency and platform scalability.
- Increased enterprise API adoption by 35% through prioritizing integration simplification and improving onboarding workflows for telemetry data platforms.

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered analytics agents using OpenAI APIs and Python to automate sales reporting and PPC bid analysis, reducing manual effort by 80% and enabling daily monitoring of operational performance across multiple marketplaces.
