SUMMARY

Product manager with experience building AI-enabled workflows that automate complex operational and sales reporting across platforms. Skilled in customer discovery and collaborating with engineering to deliver scalable, reusable automation and telemetry solutions aligned with enterprise needs.

CORE SKILLS

Product Strategy • APIs • Roadmap Strategy • Customer Discovery • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered automation workflows integrating sales, advertising, and inventory data, reducing manual reporting effort by 80% and enabling daily operational monitoring.
- Created a custom inventory management platform consolidating warehouse, FBA, and consignment tracking, eliminating fragmented workflows and achieving 100% inventory error reduction.
- Designed internal operational tooling as an ERP alternative, improving inventory and fulfillment coordination while supporting scalable process standardization across growing SKU counts.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Collaborated with executives, engineers, and key customers to prioritize analytics and API roadmap features, enhancing alignment between customer needs and scalable platform development.
- Conducted extensive customer interviews to identify common workflow patterns, translating diverse requests into reusable platform capabilities that reduced custom development to 1%.
- Balanced roadmap tradeoffs by defining MVP scope focused on summary-level telemetry reporting, covering 80% of customer needs while limiting complexity from customization.
- Synthesized customer requirements into scalable product strategies that improved delivery focus, expanded platform adoption, and minimized bespoke solutions.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Prioritized and delivered key features for the MyQ Community platform using Agile and RICE methodology, improving sprint completion and backlog efficiency.
- Increased platform adoption by 15% through data-driven roadmap adjustments focused on onboarding and user engagement across 100+ communities.
- Collaborated with UX, engineering, and customer teams to identify and resolve user friction points, boosting NPS by 10 points and strengthening engagement.
- Coordinated cross-functional planning among software, firmware, hardware, UX, and analytics teams to align delivery and expand IoT device integrations.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
