SUMMARY

Product manager with hands-on experience building AI-enabled workflows using OpenAI APIs to automate analytics and reporting. Skilled in customer discovery and cross-functional collaboration to deliver scalable, responsible AI-driven solutions that address real user needs and drive measurable impact.

CORE SKILLS

Product Strategy • APIs • Forecasting Systems • Agile Delivery • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Automated complex sales and advertising workflows by developing Python-based AI agents that cut manual reporting time by 80% and enabled daily performance monitoring across multiple marketplaces.
- Conducted over 20 customer interviews and iterative testing cycles to refine product fit, materials, and design, resulting in improved product-market fit and validated pricing strategies.
- Collaborated closely with customers and manufacturing partners through multiple feedback loops to enhance product quality and support the successful launch of LITET cycling socks.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Launched a customer-facing analytics product generating over \$200K in new revenue by defining MVP scope and aligning engineering with client needs.
- Balanced customization and scalability by prioritizing summary-level telemetry reporting, covering 80% of customer needs while limiting custom solutions to 1%.
- Translated diverse customer workflows into reusable platform capabilities through targeted discovery sessions, reducing custom development and expanding adoption.
- Influenced product roadmap strategy by collaborating with executives and engineering to align scalable API enhancements with enterprise customer requirements.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Coordinated cross-disciplinary teams across software, firmware, hardware, UX, and analytics to unify execution plans and clarify dependencies, enhancing delivery alignment for the MyQ Community platform.
- Partnered with UX and engineering to identify and prioritize user friction points, driving improvements that boosted NPS by 10 points and increased platform engagement.
