SUMMARY

Product manager with hands-on experience building AI-enabled workflows and RAG-based knowledge assistants, leading end-to-end development and defining scalable platform strategies that balance customer needs and product scalability to improve decision-making and operational efficiency.

CORE SKILLS

Product Strategy • AI Product Management • LLM Applications • APIs • Forecasting Systems • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered analytics agents integrating sales and advertising data to automate reporting and PPC bid analysis, reducing manual effort by 80% and enabling daily KPI monitoring.
- Created AI-assisted workflows combining Python calculations with OpenAI-generated recommendations to optimize keyword prioritization and bids, improving PPC decision consistency and scalability.
- Collaborated with customers and vendors through iterative feedback cycles to refine product design, enhancing quality and customer satisfaction ahead of the LITET cycling socks launch.

INDEPENDENT AI & PRODUCT CONSULTING

AI Product Consultant | 2026 - Present

- Designed and implemented a retrieval-augmented generation (RAG) knowledge assistant that consolidated technical product documentation, reducing search time from 20 to 5 minutes and enabling 90% self-service for sales and product teams.
- Created an AI-assisted workflow to match competitor products with THK equivalents, cutting interchange analysis time by 75% and decreasing reliance on senior product managers through reusable mapping logic.
- Developed an evaluation framework for AI-generated technical answers, establishing quality metrics to limit hallucination rates below 5% and ensure accuracy and trust in AI-assisted recommendations.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Synthesized customer interviews into scalable telemetry analytics requirements, reducing custom development requests to 1% while covering 80% of customer needs.
- Prioritized reusable platform capabilities in roadmap decisions, balancing engineering capacity with customer demands to enhance platform scalability and delivery focus.
- Established MVP boundaries emphasizing summary-level reporting and frequent customer workflows, accelerating product delivery and minimizing customization complexity.
- Collaborated with executives and engineering teams to align analytics and API roadmap priorities with customer value, improving strategic visibility and platform adoption.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Prioritized and delivered features for the MyQ Community platform by implementing Agile backlog management with RICE scoring, coordinating cross-functional teams to improve sprint completion and stakeholder transparency.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
