SUMMARY

Technical Product Manager with hands-on experience building internal operational platforms that unify multi-channel inventory and fulfillment workflows. Skilled in developing AI-enabled workflows using OpenAI APIs to automate decision support and improve operational efficiency across complex environments.

CORE SKILLS

Product Strategy • AI Product Management • LLM Applications • APIs • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed a centralized inventory management platform integrating local warehouses, FBA, AWD, and distributor consignments, eliminating fragmented workflows and achieving 100% reduction in inventory errors.
- Created AI-powered workflows using OpenAI APIs to automate sales reporting and PPC bid analysis, cutting manual effort by 80% and enabling daily operational monitoring across Amazon and Shopify channels.
- Built lightweight internal operational systems as an ERP alternative, supporting inventory management and fulfillment coordination that scaled SKU count from 9 to 15 without enterprise software investment.
- Combined Python-based KPI calculations with AI-generated recommendations to streamline PPC optimization, improving decision consistency and operational insight into advertising efficiency.

INDEPENDENT AI & PRODUCT CONSULTING

AI Product Consultant | 2026 - Present

- Developed a retrieval-augmented generation (RAG) knowledge assistant that consolidated technical product information from multiple catalogs and internal guides, reducing search time from 20 to 5 minutes and enabling 90% self-service completion for sales and product teams.
- Designed an AI-assisted workflow to match competitor linear motion parts with THK equivalents, creating reusable mapping logic that cuts interchange analysis time from 20 to 5 minutes and decreases reliance on senior product managers.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Synthesized diverse customer telemetry requests into scalable platform features, reducing custom development to 1% while covering 80% of user needs and improving product roadmap focus.
- Balanced tradeoffs between detailed data access and summary reporting to define a minimum viable product strategy that enhanced platform scalability and prioritized high-impact customer requirements.
- Shaped telemetry analytics roadmap by prioritizing reusable capabilities over bespoke solutions, accelerating delivery and maintaining engineering capacity alignment.

- Collaborated with executives and engineering teams to align API and analytics roadmap priorities with customer demands, increasing executive visibility and supporting platform growth.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
