SUMMARY

Product manager with hands-on experience building AI-enabled workflows, including RAG-based knowledge assistants and OpenAI API analytics agents. Skilled in customer discovery and translating enterprise needs into scalable roadmaps, driving innovative AI features that enhance user experience and operational efficiency.

CORE SKILLS

Product Strategy • AI Product Management • LLM Applications • Agile Delivery • Roadmap Strategy • Customer Discovery • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

INDEPENDENT AI & PRODUCT CONSULTING

AI Product Consultant | 2026 - Present

- Developed a retrieval-augmented generation knowledge assistant consolidating multiple technical catalogs and documentation, reducing search time from 20 to 5 minutes and enabling 90% self-service for sales and product teams.
- Designed an AI-assisted workflow to match competitor products with internal equivalents, creating reusable mapping logic that cuts interchange analysis time by 75% and decreases reliance on senior product managers.
- Established a comprehensive evaluation framework for AI-generated technical answers, defining quality metrics and human review processes to maintain hallucination rates below 5% and build user trust.

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered analytics agents that automated sales reporting and PPC bid analysis, cutting manual effort by 80% and enabling daily performance monitoring across multiple marketplaces.
- Conducted over 20 customer interviews and iterative product tests to refine product fit, materials, pricing, and design, driving improved market fit and supporting successful adoption.
- Translated direct customer feedback into product design and positioning decisions through a six-month iterative development cycle, validating pricing strategy and enhancing product appeal.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Collaborated with executives and engineering teams to prioritize analytics and API roadmap features, improving alignment with customer needs and enhancing executive insight into platform strategy.
- Conducted in-depth customer discovery to identify recurring workflow patterns, transforming one-off requests into reusable platform capabilities that expanded adoption and reduced custom development.
- Synthesized diverse customer telemetry requirements into scalable product features, balancing customization with roadmap efficiency to improve delivery scalability and reduce bespoke solutions to 1%.
- Defined MVP strategy for telemetry analytics by prioritizing summary-level reporting that addressed 80% of customer needs, enabling scalable product growth while limiting costly custom implementations.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Established a RICE-based prioritization framework for the MyQ Community platform, enhancing roadmap clarity and sprint planning discipline while aligning product, engineering, and support teams on feature and improvement priorities.
- Coordinated cross-functional execution plans across software, firmware, hardware, UX, analytics, and QE teams, improving delivery alignment and enabling expanded IoT device integrations for platform initiatives.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
