SUMMARY

Product manager with hands-on experience building AI-enabled workflows that automate complex operational tasks and reporting. Skilled in translating customer insights into scalable product capabilities and designing AI knowledge systems to enhance decision-making and efficiency.

CORE SKILLS

Product Strategy • AI Product Management • LLM Applications • APIs • Forecasting Systems • Roadmap Strategy • Operational Automation

TECHNICAL TOOLS

Python • SQL • Power BI • Databricks • Streamlit • OpenAI APIs • Azure • SQLite • Jira • Confluence

EXPERIENCE

LITET

Technical Product & Analytics Lead | 2023 - Present

- Developed AI-powered analytics agents integrating sales, advertising, and inventory data to automate complex reporting and PPC bid analysis, cutting manual effort by 80% and enabling daily KPI monitoring.
- Translated diverse marketplace and advertising challenges into scalable product capabilities, driving a 400% revenue increase and quadrupling ROAS through targeted optimization of pricing, listings, and PPC campaigns.
- Combined product experimentation with channel and operational strategies to expand Amazon, Shopify, and distributor presence, balancing growth with margin control and platform scalability.

INDEPENDENT AI & PRODUCT CONSULTING

AI Product Consultant | 2026 - Present

- Designed and implemented a retrieval-augmented generation (RAG) knowledge assistant consolidating multiple technical catalogs and internal guides, reducing search time from 20 to 5 minutes and enabling 90% self-service for sales and product teams.
- Created an AI-assisted workflow to identify competitor product equivalents by extracting key attributes and mapping them to internal products, cutting interchange analysis time by 75% and decreasing reliance on senior product managers.
- Developed a comprehensive evaluation framework for AI-generated technical answers, establishing quality standards across retrieval accuracy, citation validity, and hallucination risk to maintain user trust with a target hallucination rate below 5%.
- Translated complex customer challenges into reusable AI workflows and structured knowledge systems, delivering scalable solutions that improve decision-making and reduce manual effort across product and sales functions.

EMERSON ELECTRIC

Product Manager — Analytics & API Platforms | December 2016 - February 2022

- Collaborated with executives and engineering teams to align analytics and API roadmap priorities with strategic customer needs, enhancing platform growth and executive insight.
- Conducted extensive customer interviews to distill diverse telemetry reporting requests into scalable, reusable platform capabilities, reducing custom development to 1% and covering 80% of customer needs.

- Identified common workflow patterns across customer discovery sessions, transforming one-off reporting demands into standardized product features that expanded platform adoption and improved roadmap focus.
- Established clear MVP boundaries prioritizing high-frequency customer requirements over customization, accelerating delivery timelines and significantly improving product scalability.

CHAMBERLAIN GROUP

Software Product Manager | June 2022 - October 2023

- Introduced a RICE-based prioritization framework to resolve competing stakeholder demands, enhancing roadmap clarity, sprint planning, and cross-team alignment for the MyQ Community platform.

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY

Master of Business Administration (MBA) | 2018

FLORIDA INTERNATIONAL UNIVERSITY

Bachelor of Science (BS) in Mechanical Engineering | 2010
